Data constraints

The gender data in this report is based on voluntary information provided by employees through a gender self-identification survey conducted in October 2026. The data has significant limitations that may skew the metrics presented in this Pay Transparency report. Of the 89 total employees, only 18 participants (20%) provided gender information, leaving 80% unreported. This low disclosure rate introduces non-response bias, as individuals who chose not to report may differ systematically from those who did.

Explanatory notes

9. "Pay quartile" refers to the percentage of each gender within four equal sized groups based on their hourly pay.

* In accordance with the Pay Transparency Act and reporting rules designed to protect the anonymity and privacy of respondents, one or more gender categories has been excluded due to insufficient numbers to meet disclosure requirements.
